LIGHTING

IA ELVPWM4V1

Four-channel PWM controller

Low-voltage PWM control for compatible LED and specialist lighting applications.

AT A GLANCE

Channels	4
Output	PWM
Control	App + automation

TYPICAL APPLICATIONS

- LED lighting
- RGB control
- Low-voltage dimming

PROJECT AND COMPLIANCE NOTE

Confirm current electrical ratings, load compatibility, installation requirements and applicable compliance documentation with Infinite Automation before specification or installation. Installation and commissioning must be completed by appropriately qualified or licensed professionals in accordance with applicable Australian requirements and current manufacturer instructions. This one-page summary is a product overview and does not replace project-specific installation or compliance documentation.

Discuss specification and obtain current documentation
